

Communication

Date	06 July 2026
Team ID	Not applicable / not assigned
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with the mentor throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp group chat	All team members	Quick async sync on daily progress and any blockers
2	Progress Update	Weekly	Google Meet	All team members	Review completed tasks (data prep, model training, Flask app) and plan the coming week
3	Issue / Bug Discussion	As Needed	WhatsApp / Google Meet	Team members involved in the issue	Quickly resolve technical blockers, e.g. preprocessing errors, model/feature mismatches
4	Stakeholder Review	Bi-Weekly	Google Meet / Email	Team + Mentor (as available)	Share progress with the mentor and get feedback on model approach and direction
5	Final Demo Rehearsal	Once	Google Meet	All team members	Walk through the end-to-end demo flow and prepare for evaluator questions
6	Mentor Check-in	As Needed	Email / Google Meet	Team + Mentor	Clarify requirements and get guidance on model selection and evaluation approach, since mentor availability was occasional

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Coordinating live discussion times across team members with different schedules	Used the WhatsApp group for async updates and scheduled Google Meet calls a day in advance so everyone could plan around them
2	Mentor availability was limited to occasional, as-needed check-ins rather than fixed sessions	Documented open questions in advance and shared them over email so the mentor could respond even outside scheduled calls
3	Parallel work on main.py (model training) and app.py (Flask app) occasionally led to diverging local versions	Split clear ownership per file/module and did a quick WhatsApp sync before pushing changes to GitHub to avoid conflicts
